- SIN 871-211
Energy Consulting Services
- SIN 871-299
Introduction to New Services
- SIN 003-01
Smart Building Systems Integrator
- SIN 003-97
Ancillary Repair and Alterations

WHO IS McKINSTRY?

At McKinstry, we take responsibility for client success by delivering buildings that are well-designed, easy to maintain, cost-effective, and work at peak levels of efficiency. We pioneered and perfected an integrated delivery model — reflected in our Cycle of Services — which provides a continuum of expertise that clients can access at any point in a building’s life.

Core offerings include Consulting, Construction, Energy, and Facility Services.

Consulting

Services include engineering, sustainability, energy/environmental planning, financial and operational modeling, and commissioning.

Construction

Services include mechanical, electrical, fire protection, architectural metals, telecommunications, integrated delivery, and energy retrofits.

Energy

Offerings include performance-based contracting, active energy management, renewables, project funding, and smart building systems.

Facility Services

Offerings include mobile service, remote monitoring, operations management, facility management, and maintenance systems.
